Dear Hiring Manager,

I am writing this letter in regards with the iOS Position. Being a graduate student of Computer Science, I believe I have the skill set required for the job which are reflected in my attached resume.

- **Strong technical background:**

- Mobile Application Developer: My experience on mobile technologies can be witnessed by the mobile applications that I have made for commercial as well as personal use.
I had been entrusted with the responsibility of creating an iOS Application for NYIT (New York Institute of Technology), making Android applications during my tenure at Samay Software.
These experiences helped me enhance my swift and java skills and the exposure to the projects turned it up by a notch.
- Web Application Developer: My tenure at vMakeIT and Samay software exposed me to technologies like C#, .NET, HTML5, CSS3, jQuery and many other web technologies. I learned, tried and excelled at them applying it to the various web applications I worked on.

- **Strong communication abilities**: Volunteering for Clinton Global Initiative (CGI – New York) as registration staff and working as an Orientation Leader and International Student Ambassador at my University has enhanced my communication as well as verbal skills.
- Tenure as the Partner of the firm, vMakeIT, helped me work on and enhance my management and leadership skills as I was required to handle a group of employees, interact with the business and customers and delegate work to appropriate employee.
- Exposure in my senior year project and **Hackathon**: My senior year project helped me gain teamwork skills and enhance my ability to work under pressure in limited amount of time. Excelling in that, my team won 3rd prize at the state level project competition organized by Computer Society of India (CSI).

My education has provided me with a variety of information systems knowledge and practical skills; primarily in Mobile App development, C#, .NET development, Java development, and C development, as well as relational database architecture, SQL server query development, and database management. I also have proficient skills with website design, HTML, CSS and JavaScript development, as well as website administration.

I greatly appreciate your consideration for employment and I look forward to further discussing my qualifications in person or over the phone. I have attached my resume with this cover letter which will summarize my skills & talents. I may be reached at contact details given above. Thanks again for your time and consideration.

Sincerely,

Chintan Vaghela
